SAMPLE ANNUAL REPORT

Yáax Che' · 2014–2026

Sample document with illustrative figures. Yáax Che' is a fictional organization created for demonstration purposes; no figure in this document describes a real organization.

The notebook in numbers (illustrative)

184,300	native seedlings from 14 community nurseries
21,750 ha	under agreements with 9 ejidos · 64 camera traps
46	cenotes tested every month · 3.2 t of waste removed
132	beekeeping families · 7 community-run tourism routes
85 ha	of mangrove under restoration with fishing cooperatives
1,940	volunteers

Out of every 100 pesos (illustrative)

78 field programs

14 operations

8 fundraising

Method

1. We count living seedlings, not planted ones.
2. We test water with public protocols, and the community sees the results first.
3. Every year we publish what worked and what didn't.

Real, sourced figures about the Maya forest are on the website: /en/impact#sources
